1. The Kirov plant in the north-western part of Leningrad produces approximately twelve tanks a day. It employs 10,000 workers, 2,500 of whom are German PW's, inmates of the PW enclosure 339-4. War damage suffered by the plant has by now been repaired.
2. A newly constructed tank plant in Nizhai Tagil produces approximately 50 T-34 tanks per day. It employs 1,000 workers. Large proving grounds for tanks are adjacent to the plant.
3. The ball bearing plant located in Saratow is being enlarged. It employs 1,500 German PW's.
